

# DETEGO BRAND GUIDELINES

Using Detego's brand elements for consistent and effective visual communications

# 01. LOGO

## THE MASTER LOGO

This is Detego's master logo. Wherever possible, the logo should be used in this full-colour format.

There are two orientations: inline and stacked. You should choose the orientation that best suits the composition.

## COLOUR VARIATIONS

In low quality or black and white applications, the logo may be used in solid black against a white or light-coloured background.

When used over a dark background or image, the logo should be shown in solid white.

# 01. LOGO

## EXCLUSION ZONE

The Detego logo is a valuable asset and as such should be given sufficient space and consideration in any composition.

Surrounding the Detego logo is an exclusion zone into which no other graphic element should encroach. The exclusion zone is an invisible area equal to the width of the 'DG device' on all sides around the logo.

## POSTIONING

Wherever possible, the Detego logo should be placed in the top, right-hand corner of a layout.

# 01. LOGO

## IMPROPER USE

The Detego logo should never be altered, modified or adapted to fit a style, situation or application.

Do not stretch, squash or distort

Do not recolour

Do not remove, extend, enlarge or add elements

Do not add effects

Do not isolate or use parts of the logo

Do not rotate or flip

## 02. DG DEVICE

### DG DEVICE

Detego's device can be used as an icon such as a website favicon/avatar or in a document or layout where the full logotype has already appeared previously.

There are two variants: boxed and standalone. You should choose the variant that gives best standout.

As with the logo, the device is available as full colour, black and white.

## 03. PRODUCT LOGOS

Individual products can be represented with their own simple logotype. This is made up of the standalone device plus the product name set in Rift Bold (all caps).

Both device and type should be shown in Detego Black or white only. Gradients should not be used.

# 04. COLOUR PALETTE

## COLOUR HIERARCHY

The Detego colour palette is divided into three tiers:

**Tier 1:** Used for brand styling, colour blocking, headings and graphic elements.

**Tier 2:** Supporting palette.

**Tier 3:** Used only where additional colours are required for example in information graphics and charts.

# 05. TYPOGRAPHY

## HEADLINE FONT

Detego's headline font is Rift Bold. It should only be used for main headings and section headings – not as sub-headings or within body copy.

Only where system font restrictions mean Rift Bold is unavailable, you may use Bebas Regular.

Headline fonts should only appear in Detego Sky or Detego Blue.

## RIFT BOLD

ABCDEFGHIJKLMNOPQRSTUVWXYZ

## BEBAS REGULAR

ABCDEFGHIJKLMNOPQRSTUVWXYZ

## FEATURE FONT

Rift Regular may be used as a feature font for applications such as feature quotes, pull-out stats and infographics.

Only where system font restrictions mean Rift Bold is unavailable, you may use Bebas Regular.

## RIFT REGULAR

# 05. TYPOGRAPHY

## BODY FONT

Detego's body font is Azo Sans Light. Only where system font restrictions mean Azo Sans Light is unavailable, you may use Open Sans Light.

For print, please use the following settings:

**Font colour:** Detego Black

**Kerning:** Optical

**Tracking:** 0

## AZO SANS LIGHT

ABCDEFGHIJKLMNOPQRSTUVWXYZ

abcdefghijklmnopqrstuvwxyz

## OPEN SANS LIGHT (ALTERNATIVE)

ABCDEFGHIJKLMNOPQRSTUVWXYZ

abcdefghijklmnopqrstuvwxyz

## BOLD

For sub-headings and inline bold text, please use Azo Sans Bold.

Sub-headings can be in Detego Sky but inline bold text should remain in Detego black.

Only where system font restrictions mean Azo Sans Bold is unavailable, you may use Open Sans Bold.

# 05. TYPOGRAPHY

## TYPE HIERARCHY

An example of Detego's type hierarchy is shown here.

When not designing for standard print, adjust your sizing to maintain relative proportions.

# EXAMPLE OF A LARGE 40PT HEADLINE SET IN RIFT BOLD

A supporting sub-line in 14pt Azo Sans Light in a matching tier 1 colour to the headline

Body copy is set in Azo Sans Light, in Detego Black. In a brochure, case study or similar document, type size should be set at **9pt** with a leading of **13pt** and should always be aligned left.

Spacing between paragraphs should be set at **3mm**.

Body copy can be set to **full width** of a document or in **columns**.

**Sub headings are set in 12pt Azo Sans Bold with increased paragraph spacing before**

Atis ad qui omnisimpos il iur adiatemporem remporem. Omnime si totatet porectotatur ratem sectaes id quisqui simusam alit, inus eati dolum laccusam im voles sum exerionet volorepuda non prae. Nes moluptas reped ut earunt fuga. Genientur sit.

“EXAMPLE OF A LARGE PULL-OUT FEATURE SET IN RIFT REGULAR. THIS CAN BE IN ANY TIER 1 COLOUR TO SUIT YOUR LAYOUT.”

## 06. GRAPHIC LINES

The graphic lines are a signature of Detego's brand styling.

They consist of a series of fine, straight lines with each end extending out of the bounds of a layout.

The lines should never bend, divert or end within the bounds of the composition.

There is no set number of lines to be used but they should be used sparingly to create balance in a composition.

When used over a white background, the graphic lines should appear in Detego Grey #1.

When used over an image or a Detego Tier 1 colour or gradient, the graphic lines should appear in white with an overlay layer effect.

# 07. ICONS

## ICONS

Detego icons should be bespoke and simple in form: using fine lines with square caps and joints plus minimal use of fills.

They should appear only in tier one or tier two colours.

# 08. PHOTOGRAPHY

## CHOOSING STOCK IMAGERY

Ideally, photographic images should include people.

Where possible, crop or choose imagery with an asymmetrical composition to create interest.

Subject matter should be dynamic and inspirational rather than simply illustrative.

Industry-specific images should look relevant and believable to the target audience.

Where images show hardware, always choose the latest, most up-to-date model/version in order to give the collateral a longer shelf life.

The photograph should not appear staged. People should not be looking into the camera and should not look posed or in an unnatural or comedic situation.
